

20th Fall Harvest Vegetarian Potluck!

Sunday – Nov. 11, 2007 – Grange
**A Celebration in Gratitude for our island friendships,
abundance, good health and happiness!**

4:15 pm Arrive & Settle

4:30 – 5:30 pm Seven Experiments (VIDEO)

Rupert Sheldrake is one of the world's most innovative biologists, best known for his theory of morphic fields and morphic resonance, which leads to a vision of a living, developing universe with its own inherent memory.

How do we have that telepathic telephone experience? How do pigeons home? Do you and your pet seem to communicate? What is the medium that allows you to look right at a person that has been staring at you?

These are just some of the simple questions posed by unconventional scientist Dr. Rupert Sheldrake. Witness firsthand the dramatic answers in easy, inexpensive experiments you can perform yourself.

Using plain language, humor and easy-to-understand examples, Sheldrake enlists you as an amateur scientist in a startling exploration of everyday phenomena, the results of which are shaking up the scientific world.

These simple experiments will delight and intrigue you...and may actually let you play a role in "the next wave" of scientific discovery!
